## Summary

I am currently working towards my Associate's Degree in Software Development and will continue school until I receive my Master's Degree. I have been programming since 2014. I taught myself C# from videos and API. In my free time, I create video games. They are all written in C# but I have also programmed: Java, HTML5, CSS, JavaScript and C++, and those are all learned from school. I learn very quickly, especially anything with computers or technology. I am still learning, but I am skilled at programming and designing software. I am wanting to move into a professional environment where I can begin my career and continue to move up. I currently work at Wendy's as a manager and attend college, both full time.

## Objectives

- Work as a team in a professional environment.
- Become a more efficient and skilled individual.
- Become more skilled at communication and to advance my career.

In this position I want to challenge myself, and learn from my job. I want my job to not only give me a paycheck, but also help me learn and grow professionally. I am highly self-motivated and have a desire to succeed in whatever position I am in.

## Education

Ivy Tech Community College,

Associate of Software Development

Graduating - May 2017

I have a GPA of 3.043 out of 4. Once I get my degree at Ivy Tech, I will be transferring to a four year school and completing my Bachelor's degree in Software Engineering. I am going to continue schooling until I receive my Master's degree.

Relevant classes:

- Computer Science I
- Web Development
- Hardware/Software Support
- Computing Logic
- Database Design and Management
- Introduction to Software Development

Columbus North High School,

Core 40 with Academic Honors

Graduated - May 2015

Relevant classes:

- Computer Programming
- Pre-Calculus

## **Employment History**

Wendy's

Manager   October 2014 - Present

- I began as a crew member at Wendy's during high school.
- Became manager in September, 2015.
- I have the highest attendance of all in store managers.
- I manage and directly work with over 30 employees.

## **Hobbies & Interests**

- I enjoy programming regular applications, but also create video games on my own. I work with the Unity 3D game engine and am very experienced with its API.
- I like to upgrade and work on my PC.
- I always make sure I take time to read before bed or whenever I'm not busy.
- Enjoy the outdoors and exercise
